

# Navan's urban rain gardens

Brightening up our town, protecting our rivers, and helping our pollinators.

We are setting out to beautify our urban spaces and connect communities with beautiful handmade planters that have a very special hidden mission...

...a mission to protect our rivers by filtering surface run-off and reducing the amount of rain water entering the sewage network via our downspouts in order to filter and minimize storm water overflows into the Boyne...

...and to also help our pollinators and other wildlife with native and pollinator friendly plants in otherwise hard urban landscapes.

See [www.WildAboutNavan.ie](http://www.WildAboutNavan.ie) to learn more about our rain garden project: what they are, why we need them, and how you can get involved!
